Question 1:

What specific next step does the City intend to take following this RFI? Issue a formal RFP, vendor demonstrations, shortlisting, or another procurement approach?

Answer 1:

The City intends to post a Request for Proposal (RFP) with the potential to include vendor demonstrations.

Question 2:

How will responses to this RFI be used (e.g., market research only, defining mandatory requirements, or determining a shortlist)?

Answer 2:

The responses will be used to assist the City in the development of the RFP.

Question 3:

What budget range has the City allocated or planned for this backflow program management initiative?

Answer 3:

The City can not disclose the budget.

Question 4:

Can the City confirm the approximate scale of the program, including:

A) number of backflow assemblies, and
B) annual total of test submissions?

Answer 4:

A) Approximately 6300 backflow assemblies.

B) Approximately 7000 total of annual test submissions

Question 5:

Does the City have a preferred program funding model (City-funded vs. tester-funded)?

Answer 5:

The City's preferred program funding model is full cost recovery through user fees.

Question 6:

For integration with the City's SAP billing system, does the City require bi-directional integration, or is one-way data transfer into SAP sufficient?

WWW.BIDSANDTENDERS.COM – ORIGINAL DOCUMENT SOURCE

Answer 6:

The City requires one (1) way into SAP and then will be billed through Accounts Receivable (A/R) invoicing.

Question 7:

What data transfer frequency is required for SAP integration (real time, nightly, scheduled, on-demand?), and will the City accept alternative integration methods (e.g., APIs or scheduled CSV/flat-file exports) if requirements are met?

Answer 7:

The City requires nightly frequency to include on demand frequency.

API or CSV could be an option, however, the City is looking for feedback from the RFI to confirm.

Question 8:

When referencing "automated scheduling," is the City referring to automated reminders and visibility for upcoming and overdue tests, or to scheduling and assigning work to staff or contractors?

Answer 8:

The City is referring to automated customer reminders and visibility for upcoming tests.

Question 9:

For the Property Manager Portal, which capabilities are required in the initial implementation:

A) compliance visibility only, or
B) document submission and deficiency management by property managers?

Answer 9:

For the property management portal, the City requires compliance visibility only.

Question 10:

When referencing payment for QP certification or renewal, does the City require payment collection within the software platform, or only tracking and reconciliation of payments processed externally?

Answer 10:

The City requires data to be pushed and pulled between software and City's ERP (SAP)/(Bi-directional integration) to be used to send information to SAP and then transactions would be processed in SAP.

Question 11:

Is Canadian data residency a mandatory requirement or a preference, and are there specific privacy, regulatory, or audit standards driving this requirement?

Answer 11:

Yes, North American Residency with data portability.

Question 12:

For proof of insurance tracking, does the City require insurance to be tracked at the individual tester level, the company/service provider level, or both?

Answer 12:

The City requires proof of insurance tracking from the company level.
