IT STATEMENT OF WORK

This Statement of Work is made pursuant to the Master Agreement and is effective as of the effective date of the Master Agreement. This Statement of Work is governed by the terms and conditions of the Master Agreement. Unless otherwise explicitly stated, in the event of any conflict or inconsistency between any provision of this Statement of Work and any provision of the Master Agreement, the provisions of the Master Agreement will prevail.

1 DEFINITIONS AND ADDITIONAL DOCUMENTS

1.1 DEFINITIONS

For the purposes of this SOW, the following words have the following meanings:

A. **"City"** means The Corporation of the City of Mississauga;
B. **"Master Agreement"** means the IT Supplier Agreement dated as of [DATE] Click or tap here to enter text. between the City and the Supplier;
C. **"Project"** means the implementation of an online submission management system used by different business units at the City for application intake purposes;
D. **"Solution"** means the full solution created or provided by the Supplier to the City under the Project;
E. "**Specifications**" has the meaning as described in Section 1.2;
F. **"Statement of Work"** or **"SOW"** means this statement of work; and
G. **"Supplier"** means **[the legal entity with whom the City has entered into the Master Agreement].**

Any other capitalized terms that are not defined in this SOW and are defined in the Master Agreement will have the meaning as detailed in the Master Agreement.

1.2 ADDITIONAL DOCUMENTS

The following documents are hereby incorporated by reference into this SOW:

- **'Schedule A – Specifications'** detailing the business, functional and technical requirements of the Solution (the "**Specifications**"). In the event of a conflict between the Specifications and this SOW, the terms of the **Specifications** will prevail.

2 OVERVIEW AND BACKGROUND

Currently, the City processes certain application submissions through SurveyMonkey Apply on three (3) separate sites. Under this Statement of Work, the Supplier will improve the City's current processes by executing the Project goals and objectives detailed herein. The intent is for the City of Mississauga to enter into a long term relationship with the Supplier, with the immediate contract being for five (5) years with an option to extend for an additional five (5) years.

WWW.BIDANDTENDER.COM – ORIGINAL DOCUMENT SOURCE

The City has engaged the Supplier to undertake this Project to implement a Solution that supports two divisions and four different business units within the City of Mississauga for application-based processes. The Solution will support a workflow that includes application intake (including multi-year applications), review, applicant notifications, reporting (including final report submissions) and archiving capabilities, with built in automations and triggers in the workflow. The Solution will be easy to use by non-IT staff and applicants and allow for customized application portals that can be updated year-to-year and project-to-project. The anticipated outcomes of this Project will be to provide a Solution that streamlines the application, review and reporting processes to support the business units involved, including: Community Services, Recreation & Culture Division Community Development (Grants Portal); Community Services, Recreation & Culture, Events Development (Event Application Portal) Planning & Building, City Planning Strategies Cultural Planning & Public Art(Public Art Portal) and Planning & Building, Tourism (Tourism Event Hosting Application Portal) The purpose of each required solution is described below.

Grants Portal: this portal facilitates the application, adjudication, approval/decline and reporting process for the City's grant programs. The City's grant programs provide funding to community organizations to help advance Divisional priorities and the goals of the City's strategic plans. While the number and type of grants may vary from year to year, current grant programs include the following programs which launch annually in August:

- Arts & Culture Grant Program
- Cultural Festivals and Celebrations Grant Program
- Culture Projects Program
- Community Grant Program
- Small Project Grant Program

Additional grant programs launch through the year including:

- Live Music Grant Program (annual launch in March)
- Designated Heritage Property Grant Program (3 intake periods annually: February 1 to March 15; March 16 to June 30; July 1 to September 30)

For more information please visit: https://www.mississauga.ca/services-and-programs/community-support-programs/apply-for-a-grant/

Event Application Portal: This portal facilitates the application process for hosting large-scale events at Mississauga Celebration Square and other City locations (the "Event Application Portal"). The Event Application Portal provides event organizers with a streamlined way to submit applications, upload required documents, and track their application status, ensuring a more efficient and transparent process. It also supports adjudicators in reviewing and evaluating applications using standardized criteria. By automating workflows and integrating with municipal systems, the Event Application Portal enhances coordination between applicants, City staff, and evaluators. This Event Application Portal helps ensure that events align with the City's goals for accessibility, cultural impact, economic benefit, and sustainability, contributing to the continued success of Celebration Square as a premier event destination.

Application intake period launches annually in September. For more information please visit: https://apply-

WWW.BIDSANTENDERS.COM - ORIGINAL DOCUMENT SOURCE

cityofmississauga.smapply.ca/prog/returning_events_2027_mississauga_celebration_square_large_event_application/

Public Art Portal: This portal facilitates the art selection process for Calls to Artists, run by the Public Art Program (the "Public Art Portal"). The Public Art Portal provides artists a platform to review the artist call documents, submit their applications, and request reference checks. Once submitted, the platform allows the Public Art Program staff to assign internal and external adjudicators to assess applications and provide their scores. The Public Art Portal allows the Public Art Program to communicate with applicants directly and accept or decline applicants through the automated process. While each program is unique and changes year-to-year, the public art programs supported on this portal in 2025 include:

- Public Art Mentorship: Future Park at MCity
- Public Art Banner Program
- Great Hall Permanent Public Art
- Downtown Transit Terminal Public Art Project
- Audio Storytelling Public Art Project
- Active Transportation Bridge Public Art Project
- Amacon Block 7 Public Art Project
- Hurontario LRT Public Art Project
- Dundas BRT Public Art Project
- Light Up the Square Digital Public Art Project

Applications to the Public Art Portal are launched as opportunities are available throughout the year. For more information please visit: https://www.mississauga.ca/arts-and-culture/arts/public-art/

Tourism Event Hosting Application Portal: This portal is used to facilitate the collection of applications for Visit Mississauga's event hosting incentive program and funding (the "Tourism Event Hosting Application Portal"). The Tourism Event Hosting Application Portal provides event organizers with a streamlined way to submit applications, upload required documents, and track their application status, ensuring a more efficient and transparent process. It also supports adjudicators in reviewing and evaluating applications using standardized criteria. This platform helps ensure that events align with the Visit Mississauga's goals for accessibility, cultural impact, economic benefit, and sustainability,.

Applications to the Tourism Event Hosting Application Portal are accepted on a continuous basis throughout the year. For more information please visit: https://www.visitmississauga.ca/meet/event-hosting-program/sport-event/

3 PROJECT GOALS AND OBJECTIVES

The City of Mississauga is seeking to procure an online platform to host online applicant submissions. The scope of work for this project includes the development and implementation of a cloud-based platform with several key functionalities including facilitating applications, reviews, evaluations, recommendations, communications, approval and reporting of applications, ensuring a streamlined, transparent, and efficient process for applicants, City staff, and adjudicators Additionally, the platform will automate workflow processes such as notifications and approvals, enhance data tracking and reporting capabilities, and ensure compliance with the City's IT security and privacy standards.

The Project objectives will be to source a single software that meets the City's current and future technical and business needs which includes but is not limited to:

- To seamlessly facilitate the implementation of a web-based, mobile friendly, user-friendly and accessible software to conduct the business carried out by the Community Development, Event Development, Public Art and Tourism units across the corporation, and support their processes, standards and workflows.
- To improve customer experience when submitting online applications, increase visibility of applications (viewing status) and support high levels of applicants to the City of Mississauga grant / funding / event / art related portfolios.
- Reduce staff administration efforts for updating applications, communicating with applicants, automations, reviews or pulling customized reports associated with the applications.
- Secure a vendor that will provide technical support to all clients within a designated timeframe as per any SLA Schedule .
- Possible future expansions that may include other departments and application processes.

4 SCOPE COMPONENTS AND REQUIREMENTS

4.1 SOLUTION SCOPE

The Supplier will ensure that the Solution includes the following components:

- City system administrator functionality
- City staff functionality
- Reviewer/adjudicator functionality
- Applicant functionality
- Customized application builder
- Automations (including notifications and emails)
- Reporting / final reporting
- Data retention, as outlined in the Master Agreement
- Data migration (see section 4.1.1 for more information)
- Customizable website links (4)
- Fully configured sites or training and support provided to build out sites (see section 4.1.2 for more information)
- Two environments:, production and test/training/quality assurance
- Training and ongoing customer support
- Integrations / API Access (see section 5.1.1 for more information)

The Solution will be accessed using existing City equipment (e.g. desktops computers, laptops, tablets, etc.) and each of the following four business units will require a separate or distinct website:

1. Grants Portal (including heritage) will require **a unique URL**
2. Event Application Portal will require **a unique URL**

3. Public Art Portal will require **a unique URL**
4. Tourism Event Hosting Application Portal will require **a unique URL**

The Supplier will ensure that the Solution complies with the Specifications (Schedule B), including any functional or technical requirements therein.

4.1.1 Data Migration

The Supplier will have the ability to migrate some or all user data for one or all business units involved in the procurement (potentially historical data, such as previous applications submissions) from the current sites to the new software or provide acceptable rationale as to why the migration is not possible.

1. Grants Portal – preference to migrate user accounts and historical data
    i. Approx. 1500 users
    ii. Past 1 – 3 years historical data, approx. 600 applications.
2. Event Application Portal - preference to migrate user accounts and historical data
    i. Approx. 300 users
    ii. Past 1 – 3 years historical data, approx. 800 applications.
3. Tourism Event Hosting Application Portal - preference to migrate user accounts and historical data
    i. Approx. 80 users
    ii. Past 1 - 3 years historical data, with approx. 150 applications.
4. Public Art Portal – not required but would prefer to migrate user accounts and historical data
    i. Approx. 1100 users
    ii. Past 1 – 2 years historical data, with approx. 1000 applications.

4.1.2 Fully Configured Sites

For the initial implementation, it is preferred that the Supplier leads the build of the sites and applications with each business unit, and provides adequate training and support for non-IT City staff for the continued management, use, and build of the sites/applications.

4.2 OUT OF SCOPE

The following items will be out of scope for the work to be provided by Supplier under this SOW:

- Marketing campaigns
- Booking software integration
- Payment management software

5 DELIVERABLES

5.1 SOFTWARE DELIVERABLES

The Supplier agrees that it will provide the Deliverables detailed in the table below by the corresponding completion date:

	Deliverable	Description	Success Criteria
1.	**Software System**	See detailed software system Specifications in Schedule A	When four (4) sites have met all requirements and have been setup, configured and user Acceptance Testing has been signed off by the Community Services (CMS) Business Lead and is operational in the City's production environment.
2.	**System Environments**	Includes two (2) environments:, production and test/training/quality assurance	Two (2) fully functioning environments available for use by City staff and the City confirms Acceptance of such Deliverable.
3.	**Data Integration and system interface**	As described in Section 5.1.1 (below)	Software system successfully integrates and/or interfaces with the required systems as described in the Specifications in Schedule A and it is fully operational in the City's production environment.
4.	**Various user functionalities**	Software system includes the functionalities for the following user types: administrators, applicants, and reviewers.	Software system conforms with all the Specifications in Schedule B (User permissions/types) and is fully operational in the City's production environment and the City confirms Acceptance of such Deliverable.
5.	**Reports**	Software system conforms with all the Specifications in Section 5.2.4 (Reports) of Schedule A (Specifications)	Software system successfully generates accurate reports, and it is fully operational in the City's production environment and the City confirms Acceptance of such Deliverable.

PREVIEW
YOU MUST BE A REGISTERED PLAN TAKER TO DOWNLOAD AN UNMARKED VERSION OF THIS FILE
WWW.BIDSANDTENDERS.COM - ORIGINAL DOCUMENT SOURCE

6.	**Website**	Software system conforms with Specifications in Schedule A (Specifications)	When all requirements have been set up, configured and user Acceptance Testing has been signed off by the CMS Project Business Lead and is fully operational in the City's production environment.

5.1.1 Data Integration and System Interface

The Supplier will provide and assist with system architecture documentation, specifications including methodology, workflows, field data mapping, code definitions, business rules, interface method/program, interface runs in development, test, and production, including a method of reporting errors and exception handling during the implementation and launch phase. Including the following components:

1. Social media (Facebook, LinkedIn, Twitter, Instagram)
2. SAP
3. Microsoft Outlook
4. SharePoint
5. OneDrive
6. GIS Mapping
7. Infor
8. Simpleview (CRM solution)

5.2 SERVICES DELIVERABLES

The Supplier agrees that it will provide the deliverables detailed in the table below by the corresponding completion date:

	Deliverable	Description	Success Criteria
1.	**Project Management**	Managing the design of the solution, installation, implementation, and integration including technical management throughout the Project. See additional details in Section 5.2.1	Four (4) fully functioning application sites are available for use by City staff and the City confirms Acceptance of such Deliverable.
2.	**Project Plan**	Section 8 (8.1 Project Work Plan)	When Project Plan has been presented and accepted by the City Project Manager.
3.	**Meetings**	Weekly status meetings: • Scheduling and coordinating	Status of the Project is discussed on a weekly basis and

		weekly status meetings, to be held online/remotely Producing minutes for each meeting and promptly providing them to the City's Contact, provided that if the City's Contact chooses to add anything to the minutes for any meeting, the City's Contact may do so by providing a copy of the minutes prepared by Supplier with the City's additions to Supplier's Contact	outstanding concerns relating to the Deliverables or work plan are documented with an action plan in the meeting minutes
4.	**System configuration**	Software system conforms with all the specifications in Schedule A and solution is fully configured	When all requirements have been setup, configured and user Acceptance Testing has been signed off by the City
5.	**Testing**	As described in section 5.2.2	When all functional requirements have been setup, configured and user Acceptance Testing has been signed off by City
6.	**Training**	As described in section 5.2.3	When all applicable City Staff have been fully trained before system go live and the City confirms Acceptance of such Deliverable.
7.	**Go live launch**	Software system is live and open for use by the general public	Software system is successfully fully operational in the City's production environment and is open for use by the general public.
8.	**Maintenance and Support**	As described in Section 5.2.4 (Maintenance and Support) and the SLA Schedule.	Supplier maintenance and support plans for the Term have been Accepted by the City.

5.2.1 Project Management

- The Supplier will identify a seasoned Project Manager (PM) to manage the Project who will provide project management, control, and reporting for every step of the process.
- The Supplier will ensure that each phase of the Project is complete in a professional manner and that the appropriate team members are assigned and dedicated to each phase of the Project tasks.

Project Manager

The Supplier's Project Manager will:

- Manage the design of the Solution, installation, implementation and integration including technical management throughout the Project
- Manage the long-term requirements for support and development of the Solution
- Review Solution requirements with the City's Project Manager and core Project team
- Provide detailed project management, quality, testing, training, maintenance and operations support plans and schedule with Work Breakdown Structure (WBS), milestones, major tasks, their durations, and individuals responsible to carry out those tasks
- Provide own support/clerical staff, office facility and other resources necessary to carry-out the performance of the Services for the duration of the Project, at its own cost
- Provide regular verbal/written progress reports, as the situation warrants, to the City's Project Manager
- Produce and distribute agendas and minutes of all the meetings
- Prepare monthly and end-of-project phase progress reports

Installation and Transition

Initial installation in test environment, server(s), database(s), and network infrastructure setups; Document method and/or tools to migrate environments.

Software Implementation and Configuration

The Supplier will configure and document the set-up and build-out of all four (4) sites including all data entry so that they meet the intent and requirements of the Specifications. Workflow analysis and reporting will also be documented.

5.2.2 Testing

Testing and Quality Assurance

Testing and quality assurance are key elements of this Project. The Supplier will have demonstrated a solid understanding in configuring and integrating an online submission management system.

User Acceptance Testing

PREVIEW
YOU MUST BE A REGISTERED PLAN TAKER TO DOWNLOAD AN UNMARKED VERSION OF THIS FILE
WWW.BIDSANDTENDERS.COM - ORIGINAL DOCUMENT SOURCE

The Supplier will:

- Supply an Acceptance Testing Plan containing all the functions of the software for the City to adopt as part of its user Acceptance Testing.
- Lead and be responsible for the development of all (i) Acceptance Testing Plans; and (ii) scripts for the functional and technical requirements for all tests
- Work with the City in good faith and include all reasonable feedback and instruction from the City with the development of such Acceptance Testing Plans and scripts
- Cooperate with the City and provide reasonable assistance to the City while it conducts any Acceptance Testing

The Supplier will develop and document Acceptance Testing Plans defining:

1. How user Acceptance Testing is performed and what the model is
2. The overall strategy for validating the functionality of the Solution
3. The approach to ensure test coverage of each requirement
4. The individual test cases that will be performed to execute the Acceptance Testing strategy
5. The environments in which the Acceptance Testing will be conducted
6. Responsibilities (who will be performing the Acceptance Testing)
7. Acceptance Testing sequence
8. Results compared to objectives
9. The test case descriptions can be traced to requirements and include:

    - Test data needed to execute the Acceptance Testing
    - Preconditions required prior to the start of Acceptance Testing
    - Criteria for suspending and resuming Acceptance Testing
    - Expected test results

5.2.3 Training

Supplier will develop a training plan to support City staff in the transition to the new software within associated timeline for go live launch.

1. Conduct training classes to train City staff end-users and IT Support users
2. Comprehensive training manuals and/or recorded video training modules
3. Ongoing access to training support as needed.
4. The Supplier will be responsible for supplying equipment and materials required to conduct training sessions. The City will provide facilities as/if needed.
5. Nice to have: Ability to track what training staff has had in the Solution
6. Nice to have: Customizable knowledgebase/Wiki

WWW.BIDSANDTENDERS.COM - ORIGINAL DOCUMENT SOURCE

5.2.4 Maintenance and Support

The Supplier will be responsible for the maintenance and support of the Solution for the duration of the Term, in accordance with the SLA Schedule.

a. Preventive and Schedule Maintenance

The Supplier will be responsible for the necessary preventive and scheduled software maintenance activities required to ensure the operational stability of the Solution.

b. System Maintenance Plan

The Supplier will maintain a plan describing the activities covered, maintenance approaches, roles and responsibilities, and processes and procedures on all aspects of maintaining the Solution (a "System Maintenance Plan"). Activities covered include routine maintenance, preventative maintenance, back-up and recovery, continuous operation, performance measures, and system security.

c. Supplier System Support

The Solution support will include system administration tasks. This will include tasks such as:

1. Security monitoring and reporting
2. System performance monitoring
3. Software upgrades including patches provided for OS
4. Dedicated websites with product information and software release downloads
5. System failover testing
6. Other actions to ensure optimal performance and availability to users
7. Development of maintenance plans and Documentation
8. The Supplier is responsible for ensuring Documentation is complete and that logs of maintenance activities are kept up-to-date

PREVIEW
YOU MUST BE A REGISTERED PLAN TAKER TO DOWNLOAD AN UNMARKED VERSION OF THIS FILE

5.3 OTHER DELIVERABLES

In addition to the deliverables mentioned above, the Supplier will also provide the City with the following Deliverables detailed in the table below:

	Deliverable	Description	Success Criteria
1.	**Documentation for City to support Solution**	All required Documentation to ensure the City can fully support the Solution when operationalized, including without limitation, Documentation related to the deployment or technical support for the Solution	City's receipt of Documentation and the City confirms Acceptance of such Deliverable.

		Documentation 1. Functional System Diagrams and Manuals 2. Configuration Manuals 3. Testing and Quality Assurance plans and documentation 4. User Acceptance Testing and System Acceptance Testing plans and test cases 5. Training Manuals 6. Maintenance and Support Manuals	
2.	**Certifications requested by the City**	SOC2 and ISO Certifications	City's receipt of such true and accurate certifications.

6 SUSTAINABILITY CONSIDERATIONS

TRAINING & APPRENTICESHIP STRATEGY

The Supplier must comply with its Training and Apprenticeship strategy included in its bid with respect to the number of hours to be completed by apprentices, paid interns, and paid work experience positions. The commitment and Training and Apprenticeship Strategy are incorporated into this Contract.

The Supplier must provide an annual report to the City containing:

a) the number of hours performed under the Contract to the date of the report by apprentices, paid interns, and paid work experience positions, including an indication of how the number of hours achieved to date align with its Training & Apprenticeship Strategy; and
b) a projection for the number of hours to be performed in future months of the Contract by apprentices, paid interns, and paid work experience positions, including a planned schedule for the achievement of these future hours in alignment with its Training & Apprenticeship Strategy.

The City reserves the right to audit the Supplier's payroll data and anonymized training and apprenticeship data.

All costs associated with the Supplier's preparation, implementation, and performance of its Training and Apprenticeship Strategy are incidental to the Work, and the Supplier must not charge the City for such costs

7 RESPONSIBLITIES

7.1 CITY RESPONSIBILITIES

Subject to the Master Agreement, the City is responsible for providing the following upon the Supplier's reasonable request:

- Reasonable access to personnel knowledgeable in the City's business and City's systems pertaining to this SOW.
- Personnel to oversee and/or participate in Acceptance Testing.

The City's Project Manager (PM) will be the main point of contact for the Supplier's Project Manager. The City's PM is responsible for implementation, giving direction, communicating City information, approving goods delivered and services performed, and payments.

The City's Business Unit Leads will act as a technical resource for coordinating all system design, implementation, migration and integration issues between the City and the Supplier and will provide necessary supervision and access to City systems, information and personnel based on approved plans.

7.2 SUPPLIER RESPONSIBILITIES

Subject to the Master Agreement, the Supplier is responsible for the following:

- Assigning qualified and knowledgeable Supplier personnel to the Project that will be accountable to the City and responsible for completing the Work in accordance with this Statement of Work;
- Attend project meetings;
- Provide timely communication and reporting on the status of deliverables and timelines set forth in the Statement of Work
- Provide timely resolution of issues arising during the implementation phase, including proactive identification of any impediments that may cause a deviation from the agreed upon schedule and timelines, and proposal of suggested remedies.

The Supplier will be responsible for the design, development, configuration, installation, integration, migration and successful testing and implementation of all Project technical and functional Specifications. Further, the Supplier will be responsible to provide for the full Term of the Master Agreement all software, Services, training, Documentation, maintenance and support for the Solution, including warranties.

The Supplier's Project Manager (PM) will be responsible for communicating fully, in a detailed and proactive manner, on all matters concerning the Project and will ensure the successful timely implementation of the systems and integration into the City's existing technology and systems. The Supplier's PM is not to be replaced without written approval from the City PM.

8 SCHEDULE

8.1 PROJECT WORK PLAN

The Supplier will be responsible a project work plan covering the following project phases:

	Project Phase	Description
1.	Project Launch	Contract execution and kick-off meeting to begin the project.
2.	Planning Phase	See details in Section 5.2 (Services Deliverables), and Section 8 (Schedule) for the project work plan
3.	Implementation Phase	Design, build, and configure Solution working closely with the City. Supplier to indicate the implementation approach across the four unique portals /business units, meaning if the implementation will be sequential or in parallel.
4.	Data Migration	See details in Section 4.1.1 (Data Migration)
5.	Testing Phase	See details in Section 5.2 (Services Deliverables) and 5.2.2 (Testing) To include: user Acceptance Testing by City business staff, System testing by City technical staff, Penetration and Vulnerability testing by City assigned 3rd party, and Acceptance of all test results by City.
6.	Training	City business and technical staff are trained by Supplier on the installation, configuration, usage, and support of the Solution. See details in Section 5.2 (Services Deliverables) and 5.2.3 (Training).
7.	Go live	To include, go live prep and support.
8.	Post Go live Extra Support Phase	Extra 90-day support period from project manager, post go live, that is separate from maintenance and support in Section 5.2.4 (Maintenance and Support).

Upon the City's written approval, the parties may agree to modify the completion date for any project phase.

9 PERSONNEL

9.1 ASSIGNMENT OF PERSONNEL BY SUPPLIER

The Supplier will use commercially reasonable efforts to ensure that personnel assigned to perform tasks in this SOW continue until the completion of the Project, unless replaced in accordance with the provisions of the Master Agreement or otherwise agreed to by the City. The Supplier will be responsible for all costs of hiring and training any personnel, including replacement personnel, who may be required from time to time to perform any of the activities contemplated by this SOW.

9.2 SUPPLIER PERSONNEL

The Supplier will ensure that the personnel assigned to perform the Work under this SOW will have recent experience (within the last two (2) years) with a minimum of two (2) years of experience in the following areas:

a) The proposed Project Manager has successfully led a project of similar scope and magnitude within the past two (2) years;

b) The proposed Key Personnel and Project team has the capacity, expertise, knowledge, resources and skills to meet the City's needs for the duration of the contract and to deliver the Project on time and within budget;

c) Demonstrated experience providing professional quality reporting to facilitate business decision-making;

d) Minimum two (2) examples/references of previous projects where it was completed and/or successfully implemented is required.

The Supplier will ensure that the personnel assigned to perform the Work under this SOW will include the following:

a) A dedicated Project Manager who will oversee the Project on behalf of the Supplier, all Project management activities, and who will be the principal contact person for the Supplier to the City;

b) A technical support specialist who will provide support during testing and deployment;

c) A trainer who will deliver training to all City staff users; and

d) such other personnel, including engineers, UAT consultants, trainers and project assistants, who may be reasonably necessary to enable the Supplier to complete the Work contemplated under this SOW.

Supplier must maintain personnel of quality and expertise throughout the duration of the Project, and they must be equal to or better than proposed during the selection process, in the opinion of the City.

10 LOCATION OF WORK

All Work performed by the Supplier for the Project will take place remotely and at the City's premises at:

- Civic Centre, 300 City Centre Drive, Mississauga ON, L5B 3C1, or
- Living Arts Centre, 4141 Living Arts Dr, Mississauga, ON L5B 4B8.

When performing work for the City, the Supplier will comply with all the City's rules, procedures, policies, directives and checklists set out in the Master Agreement, provided to Supplier in writing, or posted on the City's premises.

11 DELIVERY TERMS: FOB/FREIGHT

Not applicable

12 SOW CONTACTS

Other than with respect to written notification required under the Master Agreement and without limiting any dispute resolution provisions in the Master Agreement, all other communications required pursuant to this Statement of Work will be made to the following contacts:
